

January–June 2026 Review

SIX MONTHS OF PROGRESS IN ENVIRONMENTAL **PROTECTION, CLIMATE ACTION & SUSTAINABLE DEVELOPMENT**

H.E. DR. HASSAN SHEIKH MOHAMUD
PRESIDENT OF THE FEDERAL REPUBLIC OF SOMALIA

PRESIDENT'S MESSAGE

It gives me great pleasure to commend the Ministry of Environment and Climate Change for its remarkable achievements during the first half of 2026.

The Ministry has continued to demonstrate strong leadership in advancing Somalia's environmental and climate agenda while strengthening national institutions, expanding international partnerships, and promoting sustainable development across the country.

The accomplishments highlighted in this newsletter reflect the Federal Government's commitment to addressing the growing challenges of climate change through practical action, sound policies, and inclusive collaboration. From nationwide tree planting initiatives and climate finance reforms to active participation in regional and global environmental forums, the Ministry has represented Somalia with distinction and reinforced our country's commitment to building a resilient and sustainable future.

I particularly commend the Ministry's efforts to engage young people, women, local communities, academia, and development partners in protecting Somalia's natural resources. Environmental protection is a shared national responsibility, and these collective efforts demonstrate what can be achieved through unity, innovation, and strong leadership.

As Somalia continues its journey toward peace, stability, and sustainable development, environmental resilience will remain a cornerstone of our national vision. I encourage all government institutions, the private sector, civil society, and every Somali citizen to continue supporting initiatives that safeguard our environment and strengthen our resilience to climate change.

I congratulate the leadership and staff of the Ministry of Environment and Climate Change, together with all national and international partners, for their dedication and hard work. May these achievements inspire even greater progress as we work together to build a greener, more prosperous, and climate resilient Somalia for future generations.

H.E. HAMZA ABDI BARRE

PRIME MINISTER OF THE FEDERAL REPUBLIC OF SOMALIA

PRIME MINISTER'S MESSAGE

It is with great pride that I reflect on the achievements of the Ministry of Environment and Climate Change during the first half of 2026. This period has demonstrated the seriousness with which Somalia approaches its environmental and climate responsibilities, both at home and on the international stage.

Our participation at COP30 in Belém, Brazil, brought together the Prime Minister's office, Cabinet Ministers, and senior government officials in a united effort to advance Somalia's climate priorities on the global stage. This engagement reaffirmed our country's growing voice in international climate discussions and reflected the Federal Government's determination to ensure Somalia is not merely present at these forums, but actively shaping them.

Here at home, the launch of the National Tree Planting Week marked the beginning of a nationwide campaign that speaks to the kind of practical, sustained action climate resilience demands. Efforts of this kind remind us that environmental protection is not the responsibility of government alone, it calls for the participation of every ministry, community, and citizen across the country.

I am encouraged by the Ministry's continued success in strengthening institutions, deepening partnerships with development actors, and engaging young people, women, and local communities in this shared national effort. These achievements reflect the kind of whole-of-government approach that will carry Somalia toward a more resilient and sustainable future.

The Federal Government remains fully committed to supporting the Ministry as it continues this vital work. I congratulate the Minister, his team, and all partners who have contributed to these accomplishments, and I look forward to the continued progress that lies ahead for our nation.

MINISTER'S MESSAGE

I am pleased to present the January-June 2026 edition of the Ministry of Environment and Climate Change Newsletter, showcasing the Ministry's achievements during the first six months of the year.

This period reflected Somalia's growing leadership in environmental protection, climate resilience, biodiversity conservation, and sustainable development. The Ministry successfully strengthened collaboration with Federal Member States, government institutions, development partners, the private sector, youth organizations, women, academia, and international organizations to advance Somalia's climate priorities.

During the first half of the year, the Ministry organized numerous national consultations, technical workshops, and strategic meetings aimed at strengthening climate governance, biodiversity conservation, climate finance, ozone protection, and environmental education. We also launched major national initiatives, including the National Tree Planting Campaign, consultations on Somalia's Voluntary Carbon Market Guidelines, and important discussions supporting the implementation of the National Adaptation Plan, the Long-Term Low-Emission Development Strategy, and the NDC Investment Plan.

Internationally, Somalia actively participated in regional and global climate platforms, including the Middle East Green Initiative Council, the Africa Regional Forum on Sustainable Development, the Global Environment Facility Assembly, the Hatay Climate Conference in Türkiye, the Berlin Climate Mobility Forum, and the UN Climate Change negotiations in Bonn. These engagements strengthened partnerships, promoted climate finance, and reinforced Somalia's commitment to implementing ambitious climate action.

The Ministry also continued to prioritize inclusive climate action by promoting meaningful participation of youth, women, persons with disabilities, academia, civil society, and local communities. Their contributions remain essential in building resilient institutions and sustainable environmental management across the country.

These accomplishments demonstrate Somalia's unwavering commitment to translating climate policies into practical action, strengthening institutional capacity, and ensuring that environmental sustainability remains central to national development.

I extend my sincere appreciation to our government institutions, Federal Member States, development partners, civil society organizations, and all stakeholders whose continued support has contributed to these achievements. Together, we are building a greener, safer, and more climate-resilient Somalia.

EXECUTIVE SUMMARY

The January-June 2026 edition of the Ministry of Environment and Climate Change Newsletter highlights Somalia's continued progress in advancing environmental protection, climate resilience, biodiversity conservation, and sustainable development during the first half of the year.

During the reporting period, the Ministry strengthened national coordination, expanded international partnerships, and advanced key strategic initiatives supporting the implementation of Somalia's Nationally Determined Contribution (NDC), National Adaptation Plan (NAP), Long-Term Low-Emission Development Strategy (LT-LEDS), National Biodiversity Strategy and Action Plan (NBSAP), and national climate finance priorities.

One of the Ministry's flagship achievements was the successful implementation of the **National Tree Planting Campaign**, during which **nearly 100,00 trees were planted** across **Mogadishu, Galmudug, Hirshabelle, and South West State**. Tree planting activities were carried out at **schools, universities, government institutions, and public facilities**, contributing to ecosystem restoration, greener public spaces, biodiversity conservation, and increased public awareness of environmental stewardship.

Throughout the six-month period, the Ministry organized numerous national consultations, technical workshops, climate finance forums, biodiversity meetings, ozone protection initiatives, environmental awareness campaigns, and institutional capacity-building programmes involving Federal Government institutions, Federal Member States, development partners, academia, civil society organizations, youth, women, and the private sector.

Somalia also strengthened its international presence through active participation in major regional and global climate forums, including the Middle East Green Initiative Council, the Africa Regional Forum on Sustainable Development, the Global Environment Facility (GEF) Assembly, the Hatay Climate Conference in Türkiye, the Berlin Climate Mobility Forum, and the UN Climate Change negotiations in Bonn, Germany. These engagements reinforced Somalia's commitment to climate diplomacy, international cooperation, and sustainable development.

The Ministry continued to expand its public outreach and communication efforts, significantly increasing public awareness of environmental and climate issues. During the reporting period, the Ministry's digital platforms, including its **website, Facebook, X, and other official communication channels reached more than half a million views and engagements**. In addition, the Ministry's work was featured in **more than 2,000 publications and media mentions**, including social media posts, newsletters, websites, and news platforms, reflecting growing national and international recognition of Somalia's environmental and climate initiatives.

The Ministry continued to expand its public outreach and communication efforts, significantly increasing public awareness of environmental and climate issues. During the reporting period, the Ministry's digital platforms, including its **website, Facebook, X, and other official communication channels reached more than half a million views and engagements**. In addition, the Ministry's work was featured in **more than 2,000 publications and media mentions**, including social media posts, newsletters, websites, and news platforms, reflecting growing national and international recognition of Somalia's environmental and climate initiatives.

Over the first six months of 2026, the Ministry successfully organized and participated in **more than 60 national and international events**, strengthened collaboration with **United Nations agencies, international financial institutions, development partners, diplomatic missions, and Federal Member States**, and expanded partnerships supporting climate finance, biodiversity conservation, environmental governance, and institutional development.

Collectively, these achievements demonstrate Somalia's growing leadership in climate action and environmental governance while reinforcing the country's commitment to building resilient institutions, protecting natural resources, promoting sustainable development, and creating a greener future for present and future generations.

Public Awareness Campaigns & National Observance Days

Public awareness remained a cornerstone of the Unit's 2025 work. Campaigns were intentionally designed to be **Somali-language, culturally relevant, and action-oriented**.

» Key campaigns included: -

Anti-plastic awareness Weeks (multiple regions)

World Environment Day

World Environmental Day

Youth Climate Action Day

National Tree Planting Day

World Ocean Day

The Ministry of Environment and Climate Change Commemorated World Environmental Education Day by highlighting the essential role of environmental education in protecting natural resources, raising public awareness, and fostering a culture of environmental responsibility across Somalia. The celebration emphasized that education remains one of the most effective tools for addressing environmental challenges and building a sustainable future.

The event was officially opened by Director General **Abdirisak Ahmed Ali**, who underscored the importance of environmental education as a cornerstone of national development. He noted that strengthening environmental knowledge among citizens is essential for protecting ecosystems, preventing environmental degradation, and encouraging collective responsibility for safeguarding Somalia's natural heritage. The Ministry reaffirmed its commitment to expanding environmental education initiatives and working closely with educational institutions, communities, and development partners to promote sustainable environmental practices nationwide.

The Ministry of Environment and Climate Change presented Certificates of Appreciation to outstanding young people who made significant contributions to environmental protection through community clean-up campaigns and activities aimed at restoring the beauty of the environment.

The recognition celebrated the dedication and leadership demonstrated by Somali youth in promoting cleaner communities and raising environmental awareness. The Ministry commended their commitment to protecting the environment and encouraged them to continue serving as ambassadors for environmental conservation while inspiring other young people to actively participate in building a cleaner, healthier, and more sustainable Somalia.

Janaury 30

H.E. Lt. Gen. Bashir Mohamed Jama, Minister of Environment and Climate Change, participated in the Second Middle East Green Initiative Council, where he joined regional leaders in advancing cooperation on climate action, land restoration, and environmental sustainability.

During the meeting, Somalia reaffirmed its commitment to strengthening regional partnerships and promoting practical solutions to address shared environmental challenges. The Minister highlighted Somalia's ongoing efforts to combat land degradation, enhance ecosystem restoration, and strengthen climate resilience through coordinated regional action.

On the sidelines of the Council, Minister Bashir Mohamed Jama held several bilateral meetings with fellow ministers and international leaders to strengthen cooperation on environmental protection, climate finance, and sustainable development initiatives. These engagements reinforced Somalia's commitment to expanding strategic partnerships that support the country's environmental priorities while contributing to regional and global climate action.

Janaury 31

H.E. Lt. Gen. Bashir Mohamed Jama, Minister of Environment and Climate Change of the Federal Republic of Somalia, held a bilateral meeting with **Eng. Abdulrahman Al Fadli**, Minister of Environment, Water and Agriculture of the Kingdom of Saudi Arabia, to discuss opportunities for strengthening cooperation on environmental protection and climate action.

The two ministers exchanged views on common environmental challenges facing both countries and explored opportunities to deepen collaboration through technical cooperation, knowledge exchange, and institutional partnerships. Discussions also focused on finalizing a Memorandum of Understanding that would provide a framework for future cooperation in environmental management, climate resilience, biodiversity conservation, and sustainable natural resource management.

The meeting reflected the strong and growing partnership between Somalia and Saudi Arabia and reaffirmed both countries' commitment to working together to advance sustainable development and environmental resilience.

January Highlights

Throughout January 2026, the Ministry of Environment and Climate Change advanced environmental education, recognized youth contributions to environmental protection, and strengthened regional cooperation on climate action. Somalia also expanded international partnerships through high-level engagements at the Second Middle East Green Initiative Council, reaffirming its commitment to environmental sustainability, climate resilience, and regional collaboration. These achievements reflected the Ministry's continued dedication to promoting sustainable development and advancing Somalia's national climate priorities.

The Ministry of Environment and Climate Change, in collaboration with the United Nations Environment Programme (UNEP), successfully conducted a two-day national training workshop aimed at strengthening Somalia's capacity to access, manage, and mobilize climate finance. The training brought together government officials and technical experts to enhance institutional knowledge on climate finance mechanisms that support the implementation of Somalia's **Nationally Determined Contribution (NDC)** and **National Adaptation Plan (NAP)**.

The workshop emphasized the critical role of climate finance in supporting sustainable recovery, strengthening climate resilience, and accelerating low-carbon development. Participants explored international climate finance opportunities, financing instruments, project development, and strategies for improving access to global climate funds. The Ministry reaffirmed its commitment to building national capacity and strengthening institutional readiness to mobilize the financial resources required to address Somalia's growing climate challenges.

Febraury 5

Director General **Abdirisak Ahmed Ali** officially inaugurated the technical meeting for Somalia's biodiversity project, bringing together representatives from the Federal Government of Somalia, Federal Member States, the United Nations Development Programme (UNDP), and development partners to formally launch the implementation phase of the initiative.

The meeting focused on strengthening collaboration among implementing institutions, establishing technical coordination mechanisms, and outlining implementation priorities for biodiversity conservation across the country. Participants discussed the project's objectives, implementation arrangements, and expected outcomes, reaffirming their shared commitment to protecting Somalia's unique ecosystems while promoting sustainable environmental management and biodiversity conservation.

State Minister of Environment and Climate Change **Ahmed Omar Mohamed** officially opened the Project Steering Committee meeting for Somalia's biodiversity project, which focuses on conserving terrestrial and marine ecosystems while restoring ecosystem services across environmentally vulnerable areas of the country.

The meeting reviewed the project's progress, provided strategic guidance for implementation, and strengthened coordination among government institutions and development partners. Discussions emphasized the importance of protecting Somalia's rich biodiversity while enhancing ecosystem resilience and supporting sustainable livelihoods for local communities that depend on natural resources. Participants reaffirmed their commitment to advancing environmental conservation as an essential pillar of sustainable development and climate resilience.

The Ministry of Environment and Climate Change organized a high-level national ceremony at the Office of the Prime Minister to present Somalia's key achievements from the Thirtieth United Nations Climate Change Conference (COP30) held in Belém, Brazil. The event brought together the Prime Minister, Cabinet Ministers, senior government officials, development partners, and representatives from national institutions to reflect on Somalia's successful participation at the global climate conference.

During the event, the Ministry highlighted several major accomplishments, including Somalia becoming the first country in East Africa to submit its updated Nationally Determined Contribution (NDC), advancing the implementation of the National Adaptation Plan (NAP), and strengthening access to international climate finance. Prime Minister **Hamza Abdi Barre** commended the Ministry's leadership and praised Somalia's active engagement in international climate diplomacy, recognizing the country's growing role in advancing global climate action and promoting sustainable development.

Febraury 15

The Ministry of Environment and Climate Change successfully concluded the second phase of the National Consultation Workshop on Spatial Priorities under the revision of Somalia's **National Biodiversity Strategy and Action Plan (NBSAP)** and the preparation of the country's Seventh National Report to the Convention on Biological Diversity.

The workshop brought together representatives from government institutions, Federal Member States, technical experts, development partners, and other key stakeholders to review national biodiversity priorities and strengthen coordination on the preparation of the report. Discussions focused on aligning national biodiversity planning with international commitments while identifying priority actions to improve ecosystem conservation, sustainable resource management, and biodiversity protection throughout Somalia.

Febraury 17

The Ministry of Environment and Climate Change, in partnership with the NAP Global Network, convened a national consultation workshop in Mogadishu to explore the integration of education into Somalia's National Adaptation Plan. The consultation brought together government officials, education experts, development partners, and climate specialists to strengthen the role of education in building long-term climate resilience.

During the meeting, **Faiza Ali Yusuf**, Director of the Climate Change Department, emphasized the importance of integrating climate change into education systems through innovative learning approaches, awareness programmes, and institutional collaboration. She highlighted that equipping future generations with climate knowledge and practical skills is essential for strengthening community resilience and supporting Somalia's long-term adaptation efforts. The consultation reaffirmed the Ministry's commitment to promoting climate education as a key component of sustainable national development.

Februaury 19

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, received **Hameed Nuru**, Representative and Country Director of the World Food Programme (WFP) Somalia, at the Ministry's headquarters in Mogadishu to strengthen strategic cooperation between the two institutions.

The meeting focused on expanding collaboration in climate adaptation, food security, climate-induced displacement, drought preparedness, and resilience-building initiatives. Both parties discussed opportunities to strengthen joint programmes that address the interconnected challenges of climate change, food insecurity, and humanitarian needs affecting vulnerable communities across Somalia.

The Ministry of Environment and Climate Change and the World Food Programme reaffirmed their shared commitment to coordinated action that protects lives, strengthens livelihoods, and enhances national resilience. The meeting highlighted the importance of sustained partnerships in supporting Somalia's efforts to adapt to climate change while promoting sustainable development and long-term food security.

February Highlights

Throughout February 2026, the Ministry of Environment and Climate Change continued to strengthen national efforts in biodiversity conservation, climate finance, institutional capacity development, and climate adaptation. The Ministry expanded partnerships with national and international organizations, advanced implementation of key environmental programmes, and reinforced Somalia's commitment to sustainable development through coordinated planning, stakeholder engagement, and strategic collaboration. These achievements further demonstrated Somalia's determination to build resilient institutions, protect its natural resources, and accelerate climate action in support of national development priorities.

March 4

Ayan Harare, National Climate Finance Unit Coordinator and Chair of the CCDR Steering Committee, participated in the official launch of Somalia's Country Climate and Development Report (CCDR). During the event, she highlighted the importance of the report as a strategic framework for integrating climate resilience into national planning and guiding future investments.

She emphasized that strengthening climate resilience requires coordinated action across all sectors and reaffirmed the Ministry's commitment to working closely with government institutions, development partners, and stakeholders to translate the report's recommendations into practical action.

March 5

Ayan Harare, National Climate Finance Unit Coordinator and Chair of the CCDR Steering Committee, officially opened the launch of Somalia's Country Climate and Development Report (CCDR). She highlighted the report as a major milestone in strengthening climate informed development planning and supporting Somalia's long-term resilience.

She emphasized that the report provides valuable evidence to guide policy decisions, mobilize investments, and strengthen national capacity to address climate risks while promoting sustainable economic development. The event brought together government officials, development partners, technical experts, academia, and representatives from civil society.

March 5

Hideki Matsunaga, World Bank Country Manager for Somalia, participated virtually in the launch of Somalia's Country Climate and Development Report. During his remarks, he emphasized the importance of integrating climate action with economic development to build a more resilient and sustainable future for Somalia.

He reaffirmed the World Bank's continued support for Somalia's climate and development priorities, highlighting the importance of strong partnerships and coordinated investments to strengthen resilience, improve livelihoods, and accelerate sustainable growth.

March 5

State Minister of Environment and Climate Change **Ahmed Omar Mohamed** delivered the opening remarks during the launch of Somalia's Country Climate and Development Report. He highlighted the significant impacts of climate change on livelihoods, food security, productivity, and national development, stressing that climate resilience must remain a national priority.

He called for stronger coordination among government institutions, development partners, and the private sector to increase investment in climate adaptation and sustainable development while ensuring that vulnerable communities receive the support they need.

March 5

Ayan Harare and **Stephen Ling** presented the key findings of Somalia's Country Climate and Development Report, outlining how climate change continues to affect economic growth, livelihoods, infrastructure, and national productivity.

The presentation highlighted priority actions to strengthen climate resilience, improve rural livelihoods, promote climate-smart urban development, and support sustainable economic transformation. Participants discussed how the report provides a roadmap for integrating climate action into Somalia's broader development agenda.

March 5

A high-level **panel discussion** was held during the launch of Somalia's Country Climate and Development Report, bringing together senior government officials, development partners, technical experts, and representatives from international organizations.

The discussion focused on translating the report's recommendations into practical actions that strengthen climate resilience, improve policy coordination, and mobilize investment for sustainable development. Participants emphasized the importance of continued collaboration to ensure the successful implementation of the report's recommendations.

March 5

The official launch of Somalia's Country Climate and Development Report concluded successfully in Mogadishu with the participation of government institutions, development partners, academia, civil society organizations, and technical experts.

The event was formally closed by **Faiza Ali Yusuf**, Director of the Climate Change Department at the Ministry of Environment and Climate Change. She commended all partners for their contributions and emphasized that the report provides an important foundation for strengthening climate resilience, supporting sustainable development, and guiding future climate investments across Somalia.

March 19

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, extended his warm Eid al Fitr greetings to the entire Muslim Ummah, especially the Somali people wherever they may be around the world.

The Minister prayed that Allah accepts the fasting, prayers, and acts of worship performed during the blessed month of Ramadan and blesses the Somali people with peace, unity, and prosperity. He also encouraged all Somalis to continue strengthening solidarity, supporting one another, and protecting the environment in order to build a sustainable future.

March 23

The Ministry of Environment and Climate Change commemorated **World Meteorological Day** by reaffirming Somalia's commitment to strengthening meteorological services, climate observations, and early warning systems that protect lives, livelihoods, and national development.

The Ministry highlighted the importance of reliable weather and climate information in improving disaster preparedness, supporting agriculture, strengthening water resource management, and reducing the impacts of climate-related hazards. As Somalia continues establishing its National Meteorological Agency, the Ministry reiterated its commitment to enhancing forecasting capacity, expanding climate services, and investing in modern meteorological systems that contribute to building a more climate-resilient nation.

March Highlights

Throughout March 2026, the Ministry of Environment and Climate Change strengthened Somalia's climate planning through the successful launch of the Country Climate and Development Report, bringing together government institutions, development partners, and technical experts to advance climate-informed development. The Ministry also commemorated World Meteorological Day and continued promoting climate resilience, evidence-based planning, and stronger partnerships to support sustainable development across Somalia.

April 2

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, participated in the launch of the Agricultural Sector Coordination Platform organized by the Ministry of Agriculture and Irrigation and officially inaugurated by Deputy Prime Minister **Salah Ahmed Jama**.

The forum brought together government institutions, development partners, and key stakeholders to strengthen coordination across the agricultural sector, improve food security, and enhance climate resilience. Discussions focused on promoting sustainable agricultural development, increasing productivity, and fostering collaboration among institutions to address the impacts of climate change on Somalia's agriculture sector. The Ministry reaffirmed its commitment to supporting climate-smart agriculture and strengthening partnerships that contribute to resilient livelihoods and sustainable food systems.

April 13

The Ministry of Environment and Climate Change welcomed the official launch of Somalia's National Tree Planting Week by Prime Minister Hamza Abdi Barre, marking the beginning of the annual nationwide campaign to promote environmental restoration and climate action.

The initiative aimed to strengthen biodiversity conservation, restore degraded ecosystems, and increase tree cover across the country. The campaign encouraged the active participation of government institutions, communities, youth, women, and development partners in protecting Somalia's natural environment.

H.E. Lt. Gen. **Bashir Mohamed Jama** highlighted the Government's commitment to expanding tree planting efforts, restoring degraded landscapes, and strengthening national resilience against the impacts of climate change. The Ministry reaffirmed that tree planting remains one of Somalia's key strategies for environmental restoration and sustainable development.

April 13

H.E. Lt. Gen. **Bashir Mohamed Jama**, accompanied by Minister of Commerce **Mahmoud Ahmed Adan** (Gamal) and Minister of Agriculture and Irrigation **Mohamed Abdi Hayir (Maareeye)**, participated in a joint tree-planting exercise at the headquarters of the Ministries of Environment, Commerce, and Agriculture.

The activity formed part of Somalia's National Tree Planting Campaign and demonstrated the strong collaboration among government institutions in promoting environmental conservation. The initiative highlighted the importance of restoring degraded land, increasing urban green spaces, and encouraging public participation in protecting Somalia's environment.

April 13

The Ministry of Environment and Climate Change, led by H.E. Lt. Gen. **Bashir Mohamed Jama**, in collaboration with the Ministry of Youth and Sports led by **Mohamed Abdulkadir Ali**, conducted a tree-planting campaign at the SYL headquarters in Mogadishu as part of Somalia's National Tree Planting Week.

The initiative underscored Somalia's commitment to ecosystem restoration, environmental sustainability, and climate resilience. Young people played a central role in the activity, demonstrating their commitment to environmental stewardship and highlighting the importance of youth participation in achieving long-term climate goals. The Ministry emphasized that empowering youth remains essential to building a greener and more resilient Somalia.

April 14

H.E. Lt. Gen. **Bashir Mohamed Jama** received **Abdiaziz Ali Isse**, Chairperson of the ICAA, to discuss opportunities for strengthening cooperation between the cultural and environmental sectors.

The meeting explored the important role of culture, creativity, and the arts in promoting environmental awareness, particularly among young people. Both sides agreed to strengthen collaboration through awareness campaigns and community engagement initiatives that encourage environmental responsibility while promoting Somalia's cultural heritage.

April 15

H.E. Lt. Gen. **Bashir Mohamed Jama**, together with Minister of Endowments and Religious Affairs **Mukhtar Robow Ali**, participated in a tree-planting campaign at the Ministry headquarters as part of Somalia's National Tree Planting Week.

The initiative promoted environmental restoration, reduced the impacts of climate change, and encouraged sustainable management of natural resources. Religious institutions were recognized for their important role in promoting environmental awareness and encouraging communities to embrace environmental responsibility. The campaign demonstrated the importance of integrating environmental stewardship into all sectors of society.

April 15

H.E. Lt. Gen. **Bashir Mohamed Jama**, alongside Minister of Justice **Hassan Moallim Mahmud Sheikh Ali**, led a tree-planting campaign at the Ministry of Justice during Somalia's National Tree Planting Week.

The activity reflected the Government's commitment to promoting greener public institutions while strengthening environmental protection across Somalia. Participants planted trees around the Ministry compound to support ecosystem restoration, improve urban landscapes, and contribute to building a more sustainable and climate-resilient future.

April 16

H.E. Lt. Gen. **Bashir Mohamed Jama**, together with Minister of Information, Culture and Tourism **Daud Aweis Jama**, emphasized the important role of the Ministry of Information in raising public awareness on environmental protection and climate change.

The meeting highlighted the value of media in educating communities, encouraging public participation, and promoting nationwide awareness during Somalia's National Tree Planting Campaign. Both Ministries reaffirmed their commitment to working together to strengthen environmental communication and inspire greater public engagement in climate action.

April 16

The Ministry of Environment and Climate Change, together with H.E. Lt. Gen. **Bashir Mohamed Jama** and **Alper Aktaş**, Ambassador of Türkiye to Somalia, participated in a tree-planting campaign at the Embassy of Türkiye in Mogadishu.

The initiative reinforced the strong partnership between Somalia and Türkiye in advancing environmental protection and sustainable development. By planting trees together, both sides demonstrated their shared commitment to climate action, ecosystem restoration, and strengthening international cooperation for a greener future.

The Ministry of Environment and Climate Change, led by H.E. Lt. Gen. **Bashir Mohamed Jama**, joined the Embassy of the State of Qatar in Somalia for a tree-planting campaign held as part of the National Tree Planting Week.

Together with **Dr. Abdullah bin Salem Al Nuaimi**, Ambassador of the State of Qatar, participants planted trees to support environmental conservation and urban greening initiatives. The activity reflected the strong cooperation between Somalia and Qatar in promoting sustainable development, environmental awareness, and community participation in protecting natural resources.

National Tree Planting Week

April 13–17, 2026

The Ministry of Environment and Climate Change officially launched Somalia's National Tree Planting Week, inaugurated by Prime Minister **Hamza Abdi Barre**. The annual campaign forms part of the country's broader efforts to restore degraded ecosystems and strengthen resilience against the impacts of climate change.

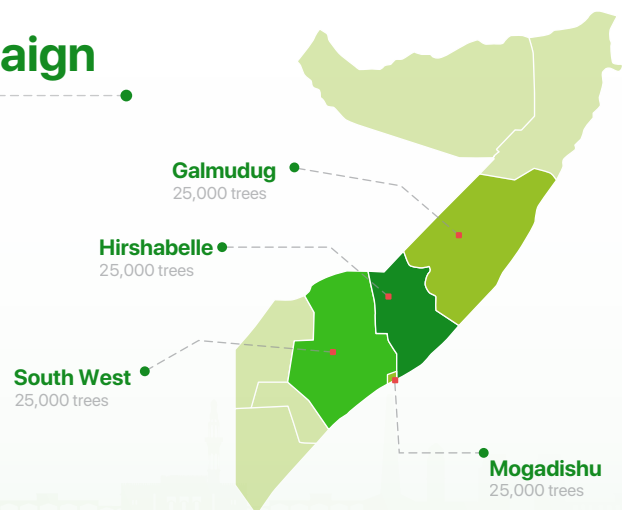

Over the course of five days, multiple government ministries including **Commerce, Agriculture, Endowments and Religious Affairs, and Justice** – along with foreign embassies (**Türkiye and Qatar**), joined tree-planting activities at their respective headquarters, supporting community engagement, raising public awareness, and mobilizing youth and women's participation.

April 19

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, received **Adarsh Swaika**, Ambassador of India to Somalia, in Mogadishu following the presentation of his diplomatic credentials.

The meeting focused on strengthening bilateral cooperation in biodiversity conservation, wildlife protection, climate resilience, and sustainable environmental management. The Government of India reaffirmed its commitment to supporting Somalia through technical cooperation, knowledge sharing, and capacity-building initiatives aimed at strengthening environmental governance and climate action.

April 20

The Ministry of Environment and Climate Change convened a national stakeholder consultation in Mogadishu on Somalia's Long-Term Low Emission Development Strategy (LT-LEDS) and the NDC Investment Plan.

Director General **Abdirisak Ahmed Ali** officially opened the workshop, highlighting Somalia's commitment to increasing greenhouse gas emission reductions to 34 percent by 2035 under the country's updated Nationally Determined Contribution. Representatives from Federal Member States, the Food and Agriculture Organization (FAO), development partners, and technical experts participated in discussions on developing an investment framework that supports adaptation, clean energy, sustainable development, and climate resilience. The consultation strengthened national coordination toward achieving Somalia's long-term vision of a low-emission, climate-resilient economy.

April 27

H.E. Lt. Gen. **Bashir Mohamed Jama** represented Somalia at the Twelfth Africa Regional Forum on Sustainable Development in Addis Ababa, where he participated in the High-Level Panel on Africa's priorities for water beyond 2026.

During the forum, Somalia emphasized the importance of moving from emergency responses to long-term resilience through investments in climate-resilient water infrastructure, improved climate information systems, and nature-based solutions. The Minister highlighted the value of integrating indigenous knowledge with innovative technologies such as solar-powered water systems, rainwater harvesting, and early warning systems. Somalia reaffirmed its commitment to achieving Sustainable Development Goal 6 and implementing Agenda 2063 through strengthened regional cooperation.

April 28

H.E. Lt. Gen. **Bashir Mohamed Jama** continued participating in the Twelfth Africa Regional Forum on Sustainable Development alongside representatives of the United Nations system, the African Union, the Economic Commission for Africa, and Member States.

Discussions focused on accelerating Africa's progress on sustainable development, climate action, water security, and green growth while strengthening regional cooperation. Somalia reaffirmed its commitment to environmental sustainability, climate resilience, and collaborative action in support of Agenda 2030 and Agenda 2063.

April 29

On the sidelines of the Africa Regional Forum on Sustainable Development, H.E. Lt. Gen. **Bashir Mohamed Jama** held a bilateral meeting with **Ouloufa Ismail Abdo**, Minister of Social Affairs and Solidarity.

The meeting focused on strengthening cooperation in social protection, climate resilience, and inclusive development. Both sides emphasized the importance of placing people at the center of climate policies and promoting partnerships that improve resilience among vulnerable communities.

H.E. Lt. Gen. **Bashir Mohamed Jama** participated in the Sustainable Development Goal 6 session on climate vulnerability, clean water, and sanitation during the Africa Regional Forum on Sustainable Development.

The discussions focused on accelerating progress toward water security in Africa while addressing the growing impacts of climate change, rapid urbanization, and financing challenges. The Minister highlighted Somalia's ongoing efforts to transition from emergency responses to long-term water resilience through sustainable investments, improved governance, and practical solutions. Somalia also shared its experiences in addressing water-related shocks and called for stronger regional cooperation to achieve universal access to clean water and sanitation.

April 29

April Highlights

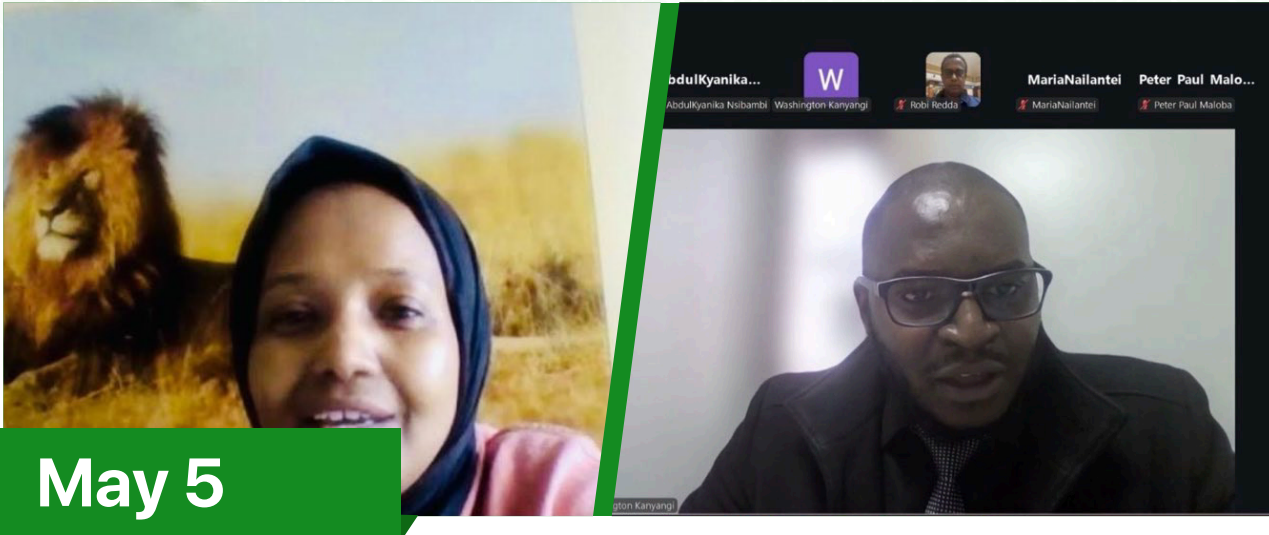

Throughout April 2026, the Ministry of Environment and Climate Change strengthened national and international climate action through the nationwide National Tree Planting Campaign, strategic bilateral engagements, and active participation in regional sustainable development forums. The Ministry also advanced long-term climate planning through consultations on Somalia's LT-LEDS and NDC Investment Plan, reaffirming the country's commitment to ecosystem restoration, climate resilience, sustainable development, and stronger international partnerships.

May 1

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, extended warm congratulations to all Ministry staff, public servants, and the wider Somali workforce on the occasion of International Labour Day.

The Minister commended the dedication, professionalism, and resilience of Somali workers whose efforts continue to contribute to national development and environmental sustainability. He reaffirmed the Ministry's appreciation for the commitment of its employees and encouraged continued collaboration in advancing Somalia's environmental and climate priorities.

May 5

Ayan Harare, National Climate Finance Coordinator, participated in the Eastern Africa Dialogue organized by the African Research and Impact Network (ARIN), where she emphasized the importance of accessible and predictable climate finance in supporting the implementation of Nationally Determined Contributions (NDCs).

She highlighted the need for stronger partnerships, increased private sector participation, and sustainable financing mechanisms that transform national climate priorities into bankable investments. The dialogue provided an important platform for regional collaboration and knowledge sharing on strengthening climate finance across Eastern Africa.

May 8

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change of the Federal Republic of Somalia, participated in a high-level international conference in Hatay, Türkiye, focusing on building resilient cities in preparation for the Thirty-First United Nations Climate Change Conference.

He outlined Somalia's ongoing efforts to strengthen climate resilience through the implementation of the Nationally Determined Contribution, investment in sustainable water infrastructure, expansion of early warning systems, and promotion of climate-smart urban development. Somalia reaffirmed its commitment to building resilient cities capable of withstanding future climate and disaster risks.

The conference highlighted valuable lessons from the reconstruction of Hatay following the devastating 2023 earthquake, emphasizing the importance of resilient infrastructure, disaster preparedness, and integrated urban planning. During a high-level panel discussion, Minister Bashir shared Somalia's experiences in addressing recurrent droughts, floods, and other climate-related disasters.

May 8

On the margins of the conference in Hatay, H.E. Lt. Gen. **Bashir Mohamed Jama** held a bilateral meeting with **Murat Kurum**, Minister of Environment, Urbanization and Climate Change of the Republic of Türkiye and President Designate of the Thirty-First United Nations Climate Change Conference.

The discussions focused on strengthening Somalia-Türkiye cooperation in environmental protection, climate resilience, institutional capacity building, and knowledge sharing. Both Ministers reviewed progress made through previous engagements and explored opportunities to deepen collaboration ahead of the upcoming global climate conference.

The meeting reaffirmed the strong partnership between Somalia and Türkiye and underscored both countries' commitment to advancing practical climate solutions through sustained cooperation.

May 8

Delegation heads participating in the Hatay Conference, including H.E. Lt. Gen. **Bashir Mohamed Jama** and representatives of United Nations agencies, visited areas affected by the 2023 earthquake to observe ongoing recovery and reconstruction efforts.

The delegation reviewed Türkiye's progress in rebuilding resilient communities and modern urban infrastructure while learning about best practices in disaster risk reduction and recovery planning. Discussions emphasized the importance of international cooperation, resilient infrastructure, and climate-sensitive reconstruction in reducing future disaster risks and strengthening preparedness.

The visit provided valuable lessons that support Somalia's efforts to enhance disaster resilience and sustainable urban development.

State Minister **Ahmed Omar Mohamed** officially inaugurated the National Climate Finance Forum organized by the Ministry of Environment and Climate Change in partnership with the National Climate Fund.

The forum brought together representatives from government institutions, development partners, the private sector, women, youth organizations, and civil society to strengthen national coordination on climate finance. Participants discussed strategies for improving access to international climate finance, mobilizing investment, and strengthening institutional systems that support climate adaptation and mitigation.

The forum reaffirmed Somalia's commitment to establishing coordinated climate finance mechanisms capable of supporting vulnerable communities while accelerating sustainable development and environmental resilience.

March 15

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, extended his congratulations to all Somali youth on the occasion of **15 May – Somali Youth Day**.

The Minister recognized young people as the backbone of the nation's development and acknowledged their vital role in environmental protection, community development, and building a sustainable future. He encouraged Somali youth to continue actively participating in environmental conservation initiatives and efforts to strengthen resilience against climate change.

May 20

The Ministry of Environment and Climate Change, in collaboration with the United Nations Development Programme (UNDP), convened the Local Project Appraisal Committee meeting for the Global Environment Facility Eight Biennial Transparency Report Project.

The meeting was co-chaired by State Minister **Ahmed Omar Mohamed** and the United Nations Development Programme Resident Representative **Lionel Laurens**. Participants reviewed the project's design, confirmed its alignment with national priorities and Global Environment Facility requirements, and formally endorsed the project for implementation.

The initiative represents an important milestone in strengthening Somalia's climate transparency framework and supporting the country's reporting obligations under the United Nations Framework Convention on Climate Change.

May 23

The Ministry of Environment and Climate Change, through its Climate Finance Office, convened a national consultative meeting on the development of Somalia's Voluntary Carbon Market Guidelines.

The meeting was officially opened by Acting Director General and Director of Finance and Administration **Kamal Sadak**, who emphasized the importance of establishing a transparent and credible carbon market that supports national development while attracting sustainable investment.

Participants discussed environmental integrity, community benefits, transparency, private sector participation, and governance mechanisms required for an effective voluntary carbon market. The consultation marked another important step toward strengthening Somalia's climate finance architecture and supporting green economic growth.

May 25

The Ministry of Environment and Climate Change officially launched nationwide consultations on Somalia's Voluntary Carbon Market Guidelines under the leadership of **Ayan Harare**, Somalia's Designated National Authority Representative under the Paris Agreement.

The consultations invited government institutions, development partners, private sector representatives, civil society organizations, and other stakeholders to provide technical input on the draft guidelines. The process aimed to establish a robust carbon market framework that promotes environmental integrity, attracts climate investment, and supports sustainable economic development while strengthening climate resilience.

May 26

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, extended Eid al Adha greetings to the Somali people, national leaders, members of the armed forces, and employees of the Ministry.

The Minister prayed for lasting peace, prosperity, good health, and continued development for Somalia. He encouraged citizens to use the occasion to strengthen unity, compassion, and solidarity while reaffirming the shared responsibility of protecting the country's natural resources and building a sustainable future for generations to come.

May Highlights

Throughout May 2026, the Ministry of Environment and Climate Change strengthened Somalia's leadership in climate finance, international cooperation, and sustainable development.

The Ministry expanded partnerships through high-level international engagements, advanced the development of Somalia's Voluntary Carbon Market framework, and convened key national climate finance forums. These achievements reinforced Somalia's commitment to building climate resilience, mobilizing investment, and advancing sustainable environmental governance.

June 4

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, represented Somalia at the Global Environment Facility (GEF) Assembly in Uzbekistan, where he delivered a high-level statement titled **"The Last Sprint Towards 2030."** During his address, the Minister reaffirmed Somalia's commitment to achieving the Sustainable Development Goals through integrated action on climate change, biodiversity conservation, pollution reduction, and sustainable natural resource management.

EIGHTH GEF ASSEMBLY SAMARKAND 2026 UZBEKISTAN

He highlighted Somalia's progress in implementing key national climate frameworks, including the Nationally Determined Contribution (NDC), National Adaptation Plan (NAP), National Biodiversity Strategy and Action Plan (NBSAP), and the National Tree Planting Campaign. The Minister also emphasized the importance of community-led environmental action, indigenous knowledge, early warning systems, and climate technologies in strengthening resilience, improving land management, and enhancing food security.

June 5

The Ministry of Environment and Climate Change officially commemorated World Environment Day 2026, bringing together government institutions, development partners, civil society organizations, youth, women, persons with disabilities, academia, and community representatives to celebrate the global event and reaffirm Somalia's commitment to environmental protection.

The celebration highlighted the importance of collective action in addressing climate change, restoring ecosystems, and promoting sustainable development. Participants discussed the need for stronger environmental stewardship, greater public awareness, and enhanced cooperation among all sectors of society to safeguard Somalia's natural resources for future generations.

June 5

Director General **Abdirisak Ahmed Ali** addressed participants during the World Environment Day celebration, emphasizing that protecting the environment is a shared national responsibility.

He highlighted the importance of collective action in tackling climate change, restoring degraded ecosystems, and promoting sustainable environmental management. The Director General encouraged government institutions, communities, and development partners to continue working together toward building a greener, healthier, and more climate-resilient Somalia.

June 5

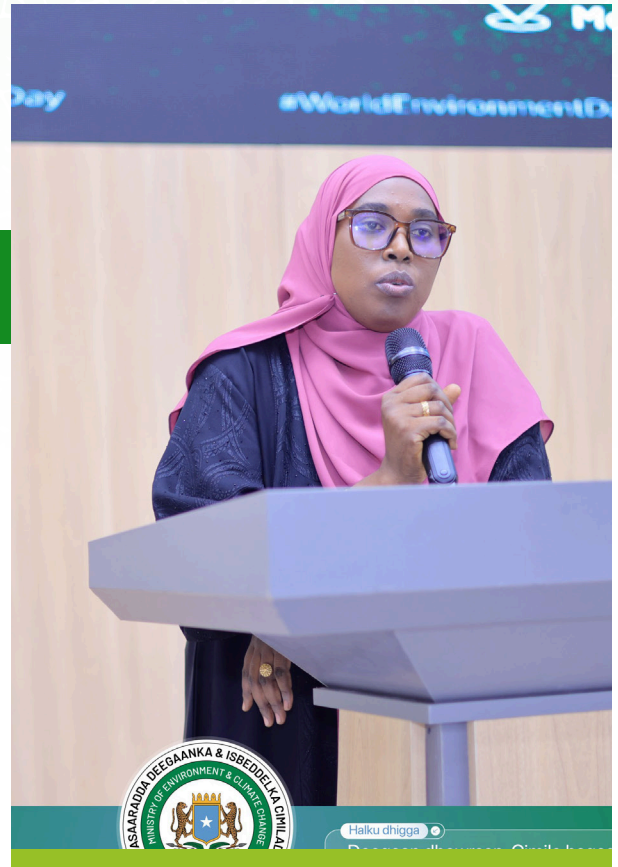

Speaking on behalf of Somalia's universities, **Dr. Mohamed Mahmoud Hasan** emphasized the critical role of higher education institutions in addressing climate change through research, innovation, education, and evidence-based policymaking.

He noted that universities serve as important centers for developing climate solutions, strengthening scientific knowledge, and preparing future generations to address environmental challenges. He called for stronger collaboration between academia, government, and development partners to advance climate research and sustainable development across Somalia.

June 5

Hafsa Omar Abdullahi, Director of the Environment Department, highlighted the significance of World Environment Day in promoting environmental awareness and encouraging public participation in climate action.

She noted that the annual celebration provides an opportunity to strengthen partnerships, inspire community engagement, and encourage practical actions that contribute to environmental protection and ecosystem restoration. She commended Somali communities for their growing commitment to protecting the country's natural resources.

June 5

State Minister **Ahmed Omar Mohamed** officially closed the World Environment Day celebrations by expressing appreciation to all participants, partners, and stakeholders who contributed to the success of the event.

He reaffirmed the Ministry's commitment to strengthening environmental protection, climate resilience, and sustainable development through continued collaboration with national institutions, development partners, civil society organizations, and local communities.

June 7

The Ministry of Environment and Climate Change convened the quarterly Director General Coordination Forum, bringing together Directors General from the Ministries of Environment across Somalia's Federal Member States.

The meeting reviewed progress made on national environmental and climate priorities while strengthening coordination between the Federal Government and Federal Member States. Participants agreed on joint actions to improve environmental governance, accelerate implementation of climate initiatives, and strengthen Somalia's resilience to climate change through enhanced institutional cooperation.

June 8

The Ministry of Environment and Climate Change commemorated World Ocean Day by highlighting the vital role oceans play in supporting biodiversity, livelihoods, food security, economic development, and climate resilience.

The Ministry called upon all Somalis to work together to protect marine ecosystems, reduce pollution, and promote the sustainable use of marine resources. The observance reinforced Somalia's commitment to safeguarding its extensive coastline and ensuring healthy oceans for present and future generations.

June 9

Acting Director General and Director of Finance and Administration **Kamal Sadak** officially opened the National Stakeholders Consultation on Somalia's ODS Banks Inventory Preparation.

The workshop brought together representatives from government institutions, customs authorities, academia, businesses, and development partners to strengthen collaboration in implementing the **Montreal Protocol** and protecting the ozone layer. Led by National Ozone Officer **Engineer Abdirahim Barre**, the consultation focused on developing Somalia's national inventory of ozone-depleting substances while strengthening institutional capacity for ozone protection and environmental compliance.

June 10

Acting Director General **Kamal Sadaq** addressed the inaugural meeting of the ACALS Project Steering Committee, reaffirming the Ministry's commitment to strengthening climate resilience through effective coordination and strategic partnerships.

The Ministry welcomed continued collaboration with the African Development Bank, the World Food Programme, UNOPS, and other development partners to support sustainable environmental management and climate adaptation initiatives benefiting communities in Hirshabelle, Puntland, and other parts of Somalia. Participants emphasized the importance of community participation and integrated approaches in building long-term resilience.

June 12

During the Sixty-Fourth Sessions of the UN Climate Change Subsidiary Bodies (SB64) in Bonn, Germany, the Ministry of Environment and Climate Change held technical discussions with the **Initiative for Climate Action Transparency (ICAT)** to strengthen climate transparency and support implementation of Somalia's Nationally Determined Contributions in the energy and waste sectors.

The meeting reinforced the shared commitment to improving climate reporting systems, enhancing institutional capacity, and supporting evidence-based implementation of Somalia's climate commitments under the Paris Agreement.

June 20

A delegation from the Ministry of Environment and Climate Change participated in the high-level **Berlin Climate Mobility Forum** in Germany, joining governments, international organizations, and development partners to discuss climate mobility, migration, displacement, and resilience.

The forum explored practical solutions to address the growing impacts of climate change on vulnerable populations while strengthening international cooperation on climate adaptation and sustainable development. Somalia reaffirmed its commitment to supporting communities affected by climate-induced displacement and promoting long-term resilience through coordinated climate action.

June 22

Director General **Abdirisak Ahmed Ali** officially inaugurated a three-day training programme on **Monitoring, Evaluation, Accountability and Learning (MEAL)** for the Ministry of Environment and Climate Change and the Ministries of Environment from Somalia's Federal Member States.

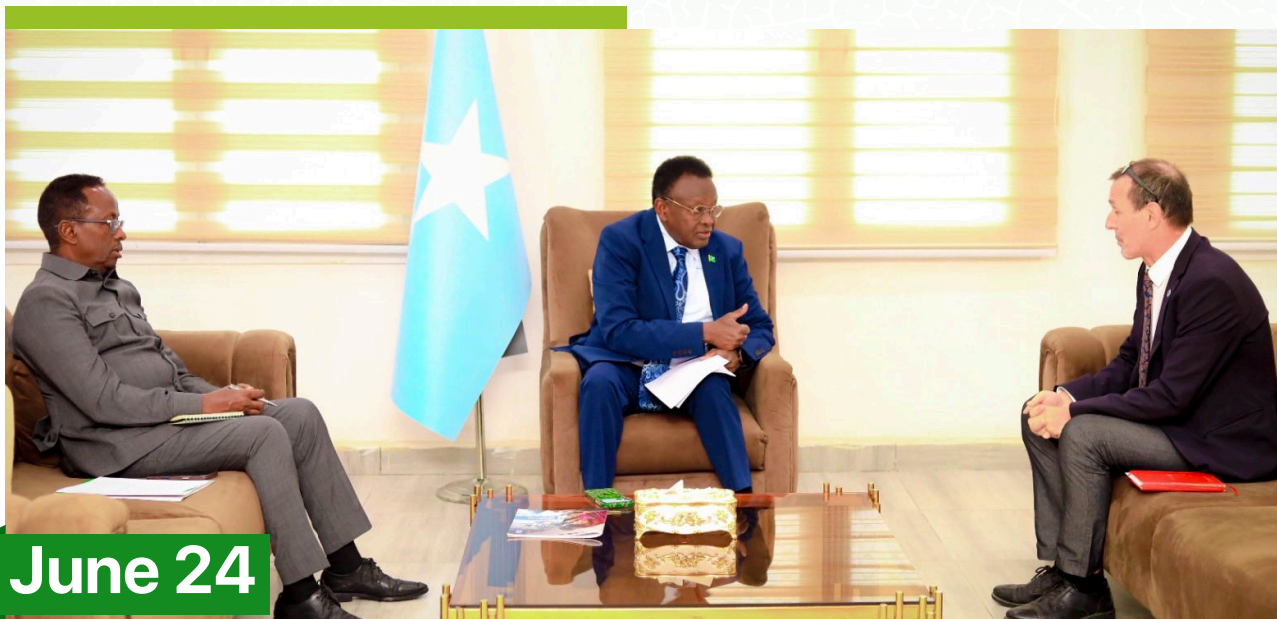

The training aimed to strengthen institutional capacity in performance monitoring, data management, accountability, and evidence-based decision-making. During the opening session, Wafaa Hassan, Director of Planning, Policy and Coordination, emphasized the importance of robust MEAL systems in improving programme effectiveness, enhancing transparency, and supporting informed policy development across Somalia's environmental sector.

June 23

Director General **Abdirisak Ahmed Ali** bid farewell to **Fausto Andreia**, outgoing Head of Climate Smart Food Systems at the World Food Programme Somalia, and welcomed **Javed Yousifi** as her successor.

The Ministry expressed appreciation for Fausto Andreia's valuable contribution to strengthening climate-smart agriculture and resilience initiatives in Somalia and looked forward to continuing strong collaboration with the World Food Programme under the leadership of Javed Yousifi.

June 24

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, met with Minister of Agriculture and Irrigation **Mohamed Abdi Hayir** (Maareeye) and the Food and Agriculture Organization Representative **Etienne Peterschmitt** to discuss strengthening cooperation on climate-smart agriculture.

The meeting focused on accelerating climate adaptation, improving sustainable agricultural practices, and increasing support for resilient farming communities affected by climate change. Participants reaffirmed their commitment to strengthening partnerships that enhance food security and promote environmentally sustainable agricultural development.

June 24

The Ministry of Environment and Climate Change, in collaboration with the **United Nations Environment Programme (UNEP)** and the Ministry of Endowments and Religious Affairs, convened the **Al-Mizan Consultation Workshop** to explore the role of Islamic values in advancing climate action and sustainable development.

The workshop examined how the principles of balance, justice, responsibility, and environmental stewardship can strengthen community participation in environmental protection while promoting sustainable development across Somalia.

June 25

The Ministry of Environment and Climate Change convened a National Workshop on establishing Somalia's **Designated National Authority (DNA)** and launched consultations on the country's **Voluntary Carbon Market Guidelines and Article 6 Policy Framework**.

The workshop brought together government institutions, development partners, technical experts, and stakeholders to strengthen climate governance, expand climate finance opportunities, and establish transparent systems that support carbon markets under the Paris Agreement. The consultation represented another significant milestone in advancing Somalia's climate policy framework and sustainable economic development.

June 26

H.E. Lt. Gen. **Bashir Mohamed Jama**, Minister of Environment and Climate Change, extended warm congratulations to the Somali people on the occasion of the **66th Anniversary of Somalia's Independence Day**, commemorating 26 June 1960.

The Minister highlighted the historical significance of the occasion and expressed hope that the anniversary would continue to inspire peace, unity, prosperity, and sustainable development across Somalia. He encouraged all citizens to work together in building a peaceful, resilient, and environmentally sustainable nation for future generations.

June 28

Dr. Guleid Artan, Permanent Representative of Somalia to the World Meteorological Organization (WMO), joined Aimable Gahigi, Director General of Meteo Rwanda, for the inauguration of the first Systematic Observations Financing Facility (SOFF)-funded automatic upper-air observing station in Huye, Rwanda.

The inauguration marks an important milestone in strengthening weather observation capabilities across Africa. The new upper-air observing station will improve the collection of critical atmospheric data, supporting more accurate weather forecasts, climate monitoring, and effective multi-hazard early warning systems.

A delegation from the Somalia National Meteorological Agency (SNMA) also attended the event, reaffirming Somalia's commitment, under the leadership of the Ministry of Environment and Climate Change, to strengthening regional collaboration, enhancing meteorological services, and advancing the Early Warnings for All initiative across Africa.

June 30

H.E. President **Dr. Hassan Sheikh Mohamud** laid the foundation stone for the construction of the new headquarters of the Ministry of Environment and Climate Change, marking a significant milestone in strengthening the Ministry's institutional capacity.

The new headquarters will provide modern office facilities, meeting and training halls, and environmentally friendly green spaces that support the Ministry's expanding mandate. The project is expected to enhance service delivery, improve coordination with partners, and strengthen the Ministry's ability to lead Somalia's environmental protection and climate resilience agenda. The groundbreaking ceremony reflected the Federal Government's continued commitment to investing in strong public institutions that support sustainable development and environmental governance.

June Highlights

Throughout June 2026, the Ministry of Environment and Climate Change strengthened national and international leadership on climate action through high-level global engagements, World Environment Day celebrations, institutional capacity-building initiatives, and strategic partnerships. The Ministry also advanced climate governance, environmental awareness, climate finance, and sustainable development while reinforcing Somalia's commitment to protecting the environment and building a more resilient future.

Digital Communication & Media Platforms

In Jan-June, the Communication & PR Unit ensured full utilization of **all available communication platforms**, recognizing that diverse audiences require diverse channels.

Platforms actively used included: -

Facebook (primary public engagement platform), **X / Twitter** (policy, diplomacy, and international engagement) **Official Ministry Website - Print materials** (posters, banners, backdrops, newsletters) Video and photography

Content was produced in both Somalia and English, ensuring inclusivity and maximizing reach.
